THE PROBLEM & THE OPPORTUNITY

From Nigeria's skills gap to a global opportunity

Every AFIS-EDI product is born digital and deliverable across Nigeria from day one — with UK-accredited quality that connects Nigerian learners and talent to international study, work and market opportunities.

The challenge in Nigeria

Nigeria has only ~700,000 university places for ~1.4 million applicants a year, and employers judge fewer than 20% of graduates immediately employable — around 85% lack basic digital skills. Ambition is abundant; accessible, practical, globally recognised routes are not.

Our solution

AFIS-EDI is a borderless digital campus: accredited British qualifications, CPD-certified tech and digital skills, and virtual work experience (WEBridge) — offered free with the EduVerse Hub platform — plus an internship-to-employment pipeline, all online and at zero upfront cost to partners.

The international opportunity

The same skills open the world: university progression and mobility routes to the UK, Europe and North America — plus global employers gaining access to English-speaking, work-ready Nigerian talent for remote roles, in a competitive time zone and at great value.
